Skills

- .NET Core
- Web API (REST)
- Microservices
- JQuery
- Javascript
- Razor Pages
- PHP
- SQL
- Microsft D365 CRM SDK
- Git
- Blazor

Languages

- Greek - Native
- English - C2

Hobbies

- Guitar effect pedals building
- Arduino Projects
- PCB Design
- Electronic Circuits Design

Introduction

Full Stack .NET Developer Results-oriented software developer with 4 years of experience building scalable enterprise applications and SaaS platforms. Specialized in the Microsoft stack, with deep expertise in .NET Core, Blazor, and SQL. Proven track record of developing high-performance microservices and integrating complex business logic using the Dynamics 365 CRM SDK. Adept at delivering end-to-end solutions, from database architecture to responsive front-end interfaces.

Education

Oct 2015 - Dec 2021

M.Sc. in Information and Electronic Engineering

International Hellenic University, Thessaloniki, Greece

Thesis: "Development of an educational application in order to improve skills in children with special needs".

Award: Received Certificate of Commendation for one of the Top 3 Best Theses of 2021 (Department-wide).

Experience

Jan 2026 - Now
Fixed Term

Full Stack Developer

ITBS

Design and development of a comprehensive (B2B) insurance agency management application, aimed at fully digitizing their daily operations, using .NET Core and MudBlazor. The platform's central quotation engine utilizes integrations (REST API calls) with multiple insurance companies' systems for real-time data extraction and comparison. Additionally, the platform includes the implementation of automation scripts via Playwright to execute time-consuming data entry and administrative processes, drastically reducing the manual workload for users. Finally, mechanisms for file import, parsing, and format conversion have been developed, ensuring a seamless flow of information between different systems.

Jan 2025 - Jan 2026

Full-Stack Developer

Vertitech

Contributed to the core development of Classter, a cloud-based SaaS EdTech platform serving K-12 and Higher Education institutions globally. Developed and maintained backend services using .NET Core within a Microservices architecture, ensuring system reliability. Built and enhanced interactive user interfaces using Blazor and Razor Pages, while maintaining legacy components in jQuery and JavaScript. Developed and consumed RESTful APIs to integrate various academic and administrative modules. Optimized SQL database queries and schemas to ensure high performance for large-scale institutional data.

Nov 2022 - Dec 2024

Full-Stack Developer

Metron Solutions SA

Developed and maintained enterprise-grade web applications utilizing .NET Core, REST APIs, and SQL to support internal business operations. Implemented seamless data synchronization between internal tools and Dynamics 365 via the CRM SDK. Designed high-performance backend architecture using Dapper for object mapping and complex SQL queries. Built dynamic client-side logic and responsive user interfaces using Razor Pages, JavaScript, and jQuery.

Courses

May 2022 - Nov 2022
Fixed Term

Application Developer

Kuehne + Nagel

Worked with ABBYY Flexicapture OCR platform. Developed applications and scripts that can recognize, allocate and extract information of text fields from images or text files.

Mar 2021 - Apr 2025
Freelancing

Profile Website Development and Maintenance

salonique-a-pied.com

Development of a profile website for tour guides.
Implementation of communication form and trilingual translation (in Greek, English and French) using PHP.
